

**PCC Proposal to Establish a Master of Science in Data Science (Senate Document #23-24-11)****TO Darryll J. Pines | President****FROM Christopher Jarzynski | Chair, University Senate**

I am pleased to forward the accompanying legislation for your consideration and approval. Wendy Stickle, Chair of the Programs, Curricula & Courses (PCC) Committee, presented the PCC Proposal to Establish a Master of Science in Data Science (Senate Document #23-24-11), which the University Senate approved at its meeting on November 1, 2023. Please inform the Senate of your decision and any administrative action related to your conclusion.

Approved:

A handwritten signature in black ink that reads "Darryll J. Pines".

**Darryll J. Pines
President****Date:****11-02-2023**

Copies of this approval and the accompanying legislation will be forwarded to:

Jennifer King Rice, Senior Vice President and Provost
Veronica Marin, Executive Secretary and Director, University Senate
Jay Rosselló, Vice President of Legal Affairs and General Counsel
Dylan Baker, Associate Vice President for Finance and Personnel
John Bertot, Associate Provost for Faculty Affairs
Elizabeth Beise, Associate Provost for Academic Planning & Programs
Rhonda Smith, Director, Division of Academic Affairs
Michael Cummings, Director, Data Science and Analytics Master of Professional Studies
Amy Chester, Director, Science Academy

PCC Proposal to Establish a Master of Science in Data Science

PRESENTED BY Wendy Stickle, Chair, Senate Programs, Curricula, and Courses Committee

REVIEW DATES SEC – October 20, 2023 | SENATE – November 1, 2023

VOTING METHOD In a single vote

**RELEVANT
POLICY/DOCUMENT**

**NECESSARY
APPROVALS** Senate, President, USM Board of Regents, and the Maryland Higher Education Commission

ISSUE

The College of Computer, Mathematical, and Natural Sciences proposes to establish a Master of Science in Data Science. This program exists currently as an iteration of the Master of Professional Studies (MPS) program. The 30-credit MPS program (titled Data Science and Analytics) has been in operation since the Winter 2019-2020 term. Master of Professional Studies programs were first approved in 2005, when the University System of Maryland Board of Regents and Maryland Higher Education Commission approved an expedited review process for master's and graduate certificate programs that respond quickly to the changing market needs of working professionals. Once a new iteration of the MPS is approved through campus PCC review, it only needs approval by the USM Chancellor to become official.

A limitation of offering this program as an MPS iteration is that all Professional Studies programs must use the same generic Federal Classification of Instructional Programs (CIP) code, rather than a CIP code that accurately describes the program content. Those who search for academic programs by using the CIP codes related to Data Science will not find this program. Moreover, some CIP codes are designated as "STEM" eligible by the US Department of Homeland Security, and international students with F1 visas who graduate from STEM designated programs may continue to work in the United States for two years longer than students in non-STEM designated programs. The generic CIP code for Professional Studies programs does not qualify as STEM-designated, even if the academic content of the Professional Studies program is STEM-related, as is the case with this program.

Consequently, the college proposes to transition the current program from a Master of Professional Studies program to a stand-alone Master of Science program in order for the program to be classified more accurately. The 30-credit curriculum will remain the same.

The Master of Science in Data Science will provide students with an education in the theory and practice of data science including mathematical and statistical foundations, computational approaches, and communication considerations. In addition to the fundamentals of data science, the program covers data science-relevant probability and statistics, algorithms, big data systems, machine learning, data mining, and analysis of networks. The program consists of 10 required 3-credit courses. The program is a non-thesis program and will have both an in-person and distance

education version. Students who finish the program successfully will be able to design, conduct, and interpret data analysis tasks. Students will be able to communicate data analysis findings and will be able to apply methods and tools of statistics, machine learning, and computer science to data studies.

The proposal was approved by the Graduate School PCC committee on September 27, 2023, and the Senate Programs, Curricula, and Courses committee on October 6, 2023.

RECOMMENDATION(S)

The Senate Committee on Programs, Curricula, and Courses recommends that the Senate approve this new academic program.

COMMITTEE WORK

The committee considered this proposal at its meeting on October 6, 2023. Michael Cummings, Amy Chester, and John Fourkas, from the College of Computer, Mathematical, and Natural Sciences, presented the proposal and answered questions from the committee. The committee unanimously approved the proposal.

ALTERNATIVES

The Senate could decline to approve this new academic program.

RISKS

If the Senate declines to approve this new degree program, the university will lose an opportunity to apply a more accurate Federal CIP code to an existing program thereby making the program more marketable.

FINANCIAL IMPLICATIONS

There are no significant financial implications with this proposal as the program already exists as a self-supported Master of Professional Studies program.

Proposal Summary

The University of Maryland Science Academy is pleased to submit this proposal for an MS in Data Science. The MPS in Data Science and Analytics has been a very successful program since launching in 2019 and this proposal is to convert that program to an MS in Data Science. CIP Code: 30.7001 Data Science, General

(PCC Log Number 23006)

Program and Catalog Information

Provide the catalog description of the proposed program. As part of the description, please indicate any areas of concentration or specializations that will be offered.

The Master of Science in Data Science provides students education in the theory and practice of data science including mathematical and statistical foundations, computational approaches, and communication considerations. In addition to the fundamentals of data science the program covers data science-relevant probability and statistics, algorithms, big data systems, machine learning, data mining, and analysis of networks. The program consists of 30-credit course work. It is a non-thesis program.

Catalog Program Requirements:

Course	Title	Credits
DATA601	Probability and Statistics	3
DATA602	Principles of Data Science	3
DATA603	Principles of Machine Learning	3
DATA604	Data Representation and Modeling	3
DATA605	Big Data Systems	3
DATA606	Algorithms for Data Science	3
DATA607	Communication in Data Science and Analytics	3
DATA612	Deep Learning	3
DATA641	Natural Language Processing	3
DATA698	Research Methods and Study Design	3
Total Credits		30

Sample plan. Provide a term by term sample plan that shows how a hypothetical student would progress through the program to completion. It should be clear the length of time it will take for a typical student to graduate. For undergraduate programs, this should be the four-year plan.

Term 5:

DATA605 Big Data Systems

DATA641 Natural Language Processing

List the intended student learning outcomes. In an attachment, provide the plan for assessing these outcomes.

Learning Outcomes

Design, conduct and interpret data analysis tasks

Communicate data analysis tasks and findings

Apply methods and tools of statistics, machine learning, computer science, to data studies

New Program Information

Mission and Purpose

Describe the program and explain how it fits the institutional mission statement and planning priorities.

This proposal is to transition the current MPS in Data Science and Analytics program to an MS in Data Science. The MPS in Data Science and Analytics launched in Winter 2019 and has seen great success and high demand. For the Fall 2023 semester, the program has over 450 completed applications as of 31 March 2023. The program had 75 registered majors during Fall 2022, a 23% increase from the prior year.

The new MS in Data Science will be directly aligned with the mission of the University, which states, in part the following.

“As a land-grant institution, the University shares its research, educational, cultural, and technological strengths with the Maryland citizenry and other constituencies. Its collaborations with State, federal, private and non-profit partners promote economic development and improve quality of life.”

The last few years have seen the emergence and rapid growth of professional education in the sciences, in particular in Data Science and other fields linked to computer science. The explosion of data and computing power has placed Data Science at the forefront of a much broader wave of new research areas requiring professional training including Machine Learning and Immersive Media. Data Science is a fundamental area and provides a basis for a range of new knowledge and skills that can be broadly applied. The University of Maryland is the best place in the region for professionals to gain these skills. U.S. News & World Report ranks UMD the highest in the region for computer science and applied mathematics.

This program will offer students the opportunity to engage in foundational technical course work in data science and analytics. The program will focus on five thematic competencies for the art and science of the new field of data science and analytics: Statistics, Machine Learning, Computing, Communication, and Professional Practice. The program will consist of 30-credit course work in the following thematic areas.

1. Statistics – Statistics here are the standard statistics subsumed by general linear models (e.g., linear regression, ANOVA, t-tests, f-tests, and multivariate extensions); discrimination, classification, ordination (e.g., PCA, MDS), linear discriminant analysis, factor analysis, and related methods; permutation and randomization methods; Bayesian estimation.

2. Machine learning – Machine learning here represents methods that are not subsumed by general linear models or other traditional distributional model-based statistics. Includes such things as: support vector machines; artificial neural networks and their derivatives and extensions; decision tree induction; random forests; other ensemble methods; affinity analysis; association rule learning; deep learning.
3. Computing – Computing here are those topics that are traditionally taught in computer science programs though restricted here to only include those core elements most necessary for professional practice in data science and analytics. Included here: programming using scripting/interpretative languages (e.g., shell, Python).
4. Communication – Communication here comprises methods and practice of communicating data science and analytics concepts, methods and results in written, verbal, and electronic media.
5. Research/professional practice – Research/professional practice here means actual design, execution, and communication of a data science and analytics project.

Program Characteristics

What are the educational objectives of the program?

When students graduate from the program, they should be able to design, conduct, interpret and communicate data analysis tasks and studies using methods and tools of statistics, machine learning, computer science, and communications.

Describe any selective admissions policy or special criteria for students interested in this program.

Admission is for the fall semester only. Applicants must meet the following minimum admission criteria as established by the Graduate School:

Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.

Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.

Applicants must provide an official copy of a transcript for all of their post-secondary work.

International applicants must fulfill all requirements relating to international academic credentials, evidence of English proficiency, financial certification, and visa documentation.

In addition, applicants must submit the following:

Required items:

Statement of purpose.

Curriculum vitae/resume.

Evidence (e.g., transcripts) of quantitative abilities by taking two courses in calculus, linear algebra and/or statistics.

Evidence (e.g., transcripts, certificates) of computer programming proficiency in one or more interpreted or compiled languages.

Optional items:

Two letters of recommendation.

Graduate Record Examination (GRE) scores.

Summarize the factors that were considered in developing the proposed curriculum (such as recommendations of advisory or other groups, articulated workforce needs, standards set by disciplinary associations or specialized-accrediting groups, etc.).

The factors that were considered in developing the proposed curriculum derive largely from our professional experiences working in areas related to data science, careful study of other data science curricula at other institutions, and educational/training needs articulated by major employers.

Select the academic calendar type for this program (calendar types with dates can be found on the [Academic Calendar](https://www.provost.umd.edu/calendar) page)

Traditional Semester

For Master's degree programs, describe the thesis requirement and/or the non-thesis requirement.

non-thesis

Identify specific actions and strategies that will be utilized to recruit and retain a diverse student body.

The primary recruitment activities will be via the CMNS Science Academy. The Science Academy uses a diverse, targeted approach when recruiting students. This digital strategy focuses on UMD alumni, current UMD graduating seniors, and working professionals in the DMV area. The admissions review process reviews for not only academic readiness but also diversity in experiences, industries, backgrounds, and career aspirations to recruit a diverse student body.

To attract a diverse student population, we will engage in the following activities:

- Representing the program in educational fairs, conferences and events, e.g. the National Leadership Conference of the National Society of Black Engineers, GEM Grad Labs.
- Advertising the program to the National Society of Black Engineers (NSBE), the Society of Women Engineers (SWE), and the Association for Women in Computing (AWC).
- Direct mailing and email campaigns to domestic and international colleges
- Outreach to UMD Campus organizations and clubs
- Holding online (virtual) open houses, information sessions and career panels

- Outreach to US Military to attract veterans
- Social media and online advertising
- Establishing graduate scholarships to provide financial aid to underrepresented minority applicants

Once enrolled, the Science Academy staff, and faculty are committed to creating and fostering a supportive environment for all students to thrive. We regularly share resources and opportunities for counseling, support, and funding. All students are expected to complete and honor the TerrapinSTRONG orientation and initiatives. Students are encouraged to take part in Grad School programs that address diversity and inclusion in higher education, build communities of support and success, and create meaningful dialogue among graduate students. Such programs include "Cultivating Community Conversations" and the "Annual Office of Graduate Diversity and Inclusions Spring Speaker Services." Faculty that are involved in the Science Academy represent many departments, have a diversity of appointments (both tenure track, professional track, and adjunct) exposing students to many future career paths. The Science Academy and faculty provide student advising, academic support, and career guidance to students to retain all students and support timely graduation.

Our student retention efforts will consist of:

- Holding "Women in Engineering, Computing and STEM" seminars to addresses the obstacles faced by women in today's technical workplace and guide our women students to maneuver through the internship and job application process
- Requiring students to attend mandatory advising sessions with the program adviser to ensure that the students' study plans are in line with their interests and career goals, and that the students make satisfactory progress toward meeting the degree requirements
- Implementing an early warning system that detects students struggling with core courses and alerts the academic advisor, who meets with the students and designs a study plan to get them back on track

Relationship to Other Units or Institutions

If a required or recommended course is offered by another department, discuss how the additional students will not unduly burden that department's faculty and resources. Discuss any other potential impacts on another department, such as academic content that may significantly overlap with existing programs. Use space below for any comments. Otherwise, attach supporting correspondence.

Three of the courses are co-listed versions of courses in common with the programs in Bioinformatics and Computational Biology, and Machine Learning: BIOI/DATA/MSML601, Probability and Statistics; BIOI/DATA/MSML602, Principles of Data Science; and BIOI/DATA/MSML603, Principles of Machine Learning. These three courses are foundational to modern quantitative and computational-based science, and thus are common to the existing programs and the proposed program. All the remaining core courses will be new to the program, and some electives may be accepted from other programs. All programs are managed by the Science Academy.

Accreditation and Licensure. Will the program need to be accredited? If so, indicate the accrediting agency. Also, indicate if students will expect to be licensed or certified in order to engage in or be successful in the program's target occupation.

No accreditation or licensure is required for the program.

Describe any cooperative arrangements with other institutions or organizations that will be important for the success of this program.

n/a

Faculty and Organization

Who will provide academic direction and oversight for the program? In an attachment, please indicate the faculty involved in the program. Include their titles, credentials, and courses they may teach for the program.

The CMNS Science Academy will work closely with the department chairs of Computer Science, Mathematics, and Electrical and Computer Engineering for shared academic oversight. The Dean of the College will assign a faculty director to the program who will provide academic and advising oversight to incoming and admitted students. Professor Michael Cummings has been serving in this role for the MPS in Data Science and Analytics since 2019. In addition, the faculty director is responsible for instructor selections and appointments and works collaboratively with the Science Academy and OES when appropriate. A full list of faculty to be involved in the program is attached.

Indicate who will provide the administrative coordination for the program

The Science Academy in the College of Computer, Mathematics and Natural Science will provide administrative coordination for the program, in collaboration with the Office of Extended Studies. The Office of Extended Studies provides program development support (budget development and projections, in house marketing research, preparation of PCC document), program management (UMD policies and procedures compliance, program website, data requests), student and program services (admission support, scheduling, registration, billing and payment, graduation, appeals), and financial management (faculty contracts, payment processing, course charge processor, net revenue distribution).

Resource Needs and Sources

Each new program is required to have a library assessment prepared by the University Libraries in order to determine any new library resources that may be required. This assessment must be done by the University Libraries. Add as an attachment.

see attached.

Discuss the adequacy of physical facilities, infrastructure and instructional equipment.

No additional physical facilities, infrastructure and instructional equipment is required for this program. Existing facilities (e.g., classrooms) and resources (e.g., instructional equipment) will be used, and these are demonstrably adequate for the proposed program. It is anticipated that most of the instruction will be in the evenings, as befitting the target student population of working adults. Thus, the use of classrooms will be outside the hours used for instruction by most other programs.

Discuss the instructional resources (faculty, staff, and teaching assistants) that will be needed to cover new courses or needed additional sections of existing courses to be taught. Indicate the source of resources for covering these costs.

For each course an instructor will be needed. The Director of the Science Academy, Faculty Director, and participating department chairs will recruit instructors and work closely with the faculty in the development of teaching materials. Costs for instructors and teaching assistants/ graders (as needed for larger enrollment) will be covered from program revenue. In addition, any costs for development of teaching materials will be handled through the new CMNS Science Academy covered by program revenue.

In addition, the Science Academy works with the departments/units developing courses on instructor selections and appointments.

Discuss the administrative and advising resources that will be needed for the program. Indicate the source of resources for covering these costs.

The CMNS Science Academy will provide the academic and advising oversight to incoming and admitted students. Revenue generated from the program will be used to support administrative and advising resources including a Program Manager. No state resources will be used to support the program

Use the Maryland Higher Education Commission (MHEC) commission financial tables to describe the program's financial plan for the next five years. See help bubble for financial table template. Use space below for any additional comments on program funding.

The financial plan is attached. The program will generate sufficient revenue to be self sustained.

Implications for the State (Additional Information Required by MHEC and the Board of Regents)

Explain how there is a compelling regional or statewide need for the program. Argument for need may be based on the need for the advancement of knowledge and/or societal needs, including the need for "expanding educational opportunities and choices for minority and educationally disadvantaged students at institutions of higher education." Also, explain how need is consistent with the [Maryland State Plan for Postsecondary Education](https://mhec.state.md.us/About/Documents/2017.2021%20Maryland%20State%20Plan%20for%20Higher%20Education.pdf).

See support document attachment, Market Analysis, for a full analysis of the market as of March 2023. Our research indicates a much faster than average growth in computer and information research scientist positions nationally in the next 10 years. As more jobs become available in this area, it is our responsibility to respond to this need by preparing the workforce. Our graduates will complete the program with the skills and knowledge to fill the open positions in the market. Our program directly aligns with the Maryland State Plan for Postsecondary Education and the principles of public education in the State of Maryland. This program in the Science Academy increases access to higher education (specifically graduate level education) and increases the diversity of graduate students

Present data and analysis projecting market demand and the availability of openings in a job market to be served by the new program. Possible sources of information include industry or disciplinary studies on job market, the [USBLS Occupational Outlook Handbook](https://www.bls.gov/ooh/), or Maryland state [Occupational and Industry Projections](http://www.dlir.state.md.us/lmi/iandoproj/) over the next five years. Also, provide information on the existing supply of graduates in similar programs in the state (use MHEC's Office of Research and Policy Analysis [webpage](http://mhec.maryland.gov/publications/Pages/research/index.aspx) for Annual Reports on Enrollment by Program) and discuss how future demand for graduates will exceed the existing supply. As part of this analysis, indicate the anticipated number of students your program will graduate per year at steady state.

See support document attachment, Market Analysis, for a full analysis of the market as of March 2023. Our research indicates a much faster than average growth in computer and information research scientist positions in the field nationally (21%) in the next 10 years. Growth in the state of Maryland is projected at 7%. Lastly, following the enrollment trends at other Maryland programs, our successful MPS enrollments, coupled with the projected job growth in this area, the program anticipates enrollment greater than 40 students per year. These positions are found across the federal government, software publishers, professional and technical services, hospitals, higher education, and other employment locations.

Identify similar programs in the state. Discuss any differences between the proposed program and existing programs. Explain how your program will not result in an unreasonable duplication of an existing program (you can base this argument on program differences or market demand for graduates). The MHEC website can be used to find academic programs operating in the state: http://mhec.maryland.gov/institutions_training/pages/HEPrograms.aspx

Other similar programs in the State of Maryland are research focused degrees. Our program will be differentiated and attractive to the professional learner in its applied nature. While other programs in the state do exist, most are either research focused and or only available in an online or blended space. The UMD program will be available both in person and online with an applied and experiential approach.

Discuss the possible impact on Historically Black Institutions (HBIs) in the state. Will the program affect any existing programs at Maryland HBIs? Will the program impact the uniqueness or identity of a Maryland HBI?

We do not foresee any negative impacts on the uniqueness or identity of any Maryland HBIs. Rather, we see our program complementary in several ways. First, most HBIs in the state do not have related degree programs, and thus our program provides HBI students more opportunities for an

advanced degree in an area not presently offered at their current institution. Second, there is distinct differentiation between the somewhat related programs at Maryland HBIs. The Applied Computer Science MS program at the University of Maryland, Eastern Shore (UMES) and the Advanced Computing MS program at Morgan State University, although listed in our market research document, are fundamentally different in subject matter coverage from the Data Science MS covered by this proposal. The UMES and Morgan State programs are more broadly computer science-focused (sans theoretical aspects of the field). These degree programs are geared toward students who would be employed in various areas of computer science. Our degree program is geared toward data-informed or data-driven employment opportunities and emphasizes the interdisciplinary nature of data science

OES In-House Market Research: Other Institution Comparison

Program Name = Data Analytics, MS

Institution	Website	Delivery Method	Degree Name & Type (MPS, MA, MS, MPH, etc.)	# of Credits	Tuition (course or credit)		Target Population	Prior Education/ Pre-Requisites
					Resident	Non-Resident		
Big Ten Institutions								
University of Illinois Urbana-Champaign	https://cs.illinois.edu/academics/graduate/professional/mcs/online-master-computer-science-data-science/	Online	Data Science, MCS (Master of Computer Science)	32 credits (8 4-credit courses)	\$670/credit		Students interested in the art of extracting new knowledge and finding meaningful information in a massive sea of data	Applicants should hold a 4-year bachelor's degree. Students with a bachelor's degree in a field other than CS are encouraged to apply, but to succeed in graduate-level CS courses, they must have prerequisite coursework or commensurate experience in object-oriented programming, data structures, algorithms, linear algebra, and statistics/probability. Applicants without this can strengthen their application for admission by passing the optional Data Structures Proficiency Exam.
Indiana University Bloomington	https://data-science.indiana.edu/program/ms-data-science-online/index.html	Online and F2F	Data Science, MS	30 credits	\$485.00/credit	\$797.50/credit	<p>*Online Program: Designed to provide convenience and flexibility to midcareer professionals.</p> <p>*Residential Program Applied Data Science Track: This track is ideal for students with a background in the humanities, social sciences, or any other non-STEM field, as well as for students uninterested in a math-oriented course load</p> <p>*Residential Program Computational and Analytical Track: Designed for students who have a strong STEM background and are ready to advance their career as data specialists.</p>	<p>Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.</p> <p>Online Program: Before applying to this program, you should have a basic understanding of the programming languages Python and R, in addition to math and probability.</p> <p>*Residential Program Computational and Analytical Track: GRE score (quantitative) of 160 or higher. A grade of B or higher in college calculus I and II, a grade of B or higher in a college-level algorithms or data structure course, A grade of B or higher in two college-level programming courses.</p>
University of Iowa	http://grad.admissions.uiowa.edu/academic/data-science-ms	F2F	Data Science, MS	30 credits	\$1,002/credit	\$2,625/credit	The Master of Science program in data science aims to train the next generation of data scientists with the analytical and technical skills to explore, formulate, and solve complex data-driven problems in science, industry, business, and government.	Applicant must have Three Letters of Recommendation; unofficial or official transcripts sent to admissions
University of Michigan Ann Arbor	https://cs.umich.edu/stat/masters_stat/online/mastersprograms/data-science-masters-program.html	F2F	Data Science, MS	30 credits	\$1,790/credit	\$3,247/credit	Full-time students interested in the confluence of (1) Computer and Information Sciences (2) Statistical Sciences, and (3) Domain Expertise.	<p>Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.</p> <p>While a Data Science undergraduate major is not required, it is expected that applicants will have at least the following background before they join: 2 semesters of college calculus, 1 semester of linear or matrix algebra, 1 introduction to computing course</p>
Michigan State University	https://stat.mstatci.msu.edu/graduate-programs/prospective-students/ms-in-data-science.aspx	F2F	Data Science, MS	30 credits	\$812/credit		The MSDS prepares professional students for the demands of tomorrow's workplace in data-driven decision making. Data science is an emerging interdisciplinary field whose purpose is the extraction of actionable insights from data. It employs theories and techniques from the core areas of statistics, computational mathematics, computer science, and information science. Our MSDS provides high-quality training in state-of-the-art data analysis and computational methods. We include courses on the principles	<p>Required application materials include a 2-page letter of motivation (combined personal statement and academic statement, please do not submit two separate letters); a detailed CV/resume including all relevant industrial experience if applicable; full official transcripts from undergraduate and/or graduate institutions, sent by the granting institutions (unofficial copies can be uploaded by the applicant);</p> <p>a minimum of three letters of recommendation sent directly by the recommenders (not attached to the application); if the mother tongue of the candidate is not English,</p> <p>A four-year bachelor's degree from an accredited college or university in computer science, math, statistics, engineering, natural sciences, or a related field. A minimum GPA of 3.5 (or the equivalent in other grading scales) in undergraduate coursework is normally expected to be considered for admission. Mathematics: Calculus (2 semesters). Multivariable Calculus (1 semester). Linear Algebra (1 semester). Statistics (1 semester). Computer Programming (2 semesters). Experience with mathematical software environments such as Matlab, R or the equivalent is a definite plus, but not a total substitute for experience with a general-purpose programming language. A class on advanced data structures is also a plus.</p>
University of Minnesota Twin Cities	https://data-science.umn.edu/masters	F2F	Data Science, MS	31 credits	\$1,128/credit	\$1,412/credit	Students who want a strong foundation in the science of Big Data and its analysis by gathering in a single program the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods.	
University of Nebraska-Lincoln	https://graduate.unl.edu/academics/programs/COMP-MS	F2F	Computer Science, MS	30 credits	\$472/credit	\$1,285/credit	The School of Computing offers opportunities for students to develop teaching skills in support of undergraduate instruction and to enhance research skills in support of the department's active research programs. The goal is to build a foundation for future scientific discovery, engineering innovation, and scholarly and professional achievement.	Applicant must submit an Application for Admission with \$50 non-refundable application fee. One set of transcripts; Curriculum vitae Three letters of recommendation; GRE is not required; Statement of purpose, including research interests, objectives, and potential SoC faculty names
Northwestern University	https://ps.northwestern.edu/masters/data-science	Online	Data Science, MS 4 Specializations: Analytics and Modeling, Artificial Intelligence, Data Engineering, or Analytics Management	36 credits	\$4,550/course		Students interested in learning how to utilize relational and document database systems and analytics software built upon open-source systems such as R, Python, and TensorFlow.	Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.
Northwestern University	https://ps.northwestern.edu/masters/data-science	F2F	Accelerated Data Science, MS	12 Courses	\$14,715/per quarter		Students are encouraged to find and arrange part-time internships or roles with area organizations, international and domestic students are encouraged to apply for the accelerated option. Admitted international students are eligible to apply for and receive a student visa.	Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.
Penn State Great Valley	https://greatvalley.psu.edu/academics/asters-degrees/data-analytics	F2F	Data Analytics, MS	30 credits	\$1,160/credit	\$1,877/credit	Students typically are fresh out of undergraduate studies. Through its emphasis on research, this program is designed to prepare you for entry into doctoral programs in data analytics. The curriculum has five required courses and three electives. You'll take a research methods class and must	Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.
Penn State Great Valley	https://greatvalley.psu.edu/academics/asters-degrees/data-analytics	F2F	Data Analytics, MPS	31 credits	\$1,160/credit	\$1,877/credit	Intended for professionals looking to acquire analytical skills relevant to the workplace, the curriculum consists of six required courses and three electives. The program culminates in a capstone course that builds upon the theories, technology, and skills learned in previous coursework.	Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.
Purdue University	https://www.stat.purdue.edu/academic_programs/graduate/gradDSfinance.html	F2F	Data Science in Finance Residential Program, MS	33 credits	\$347.85/credit	\$948.30/credit	The goal of the program is to equip students with the tools necessary to pursue a career in a quantitative financial field. The 2-year course work provides students with comprehensive and practical knowledge of the mathematical, statistical, and computational skills. The following courses are	Included in this application you must submit the following: Short answer items, each with less than 200 words (The Statement of Purpose on the application package is not required); GRE scores (optional); Diversity Essay; required for U.S. applicants only; English proficiency scores; required for all non-native English speakers; Recommendation letters are required to be submitted
Rutgers University New Brunswick	https://cas.rutgers.edu/ms-in-data-science	F2F	Data Science, MS- Statistics Track Data Science, MS- Computer Science Track	Statistics Track- 30 credits CS Track- 36 credits	\$1,034/credit	\$1,758/credit	The Statistics track directs its focus towards the data analysis aspects of the Data Science field, whereas the Computer Science (CS) track concentrates more on its computer science aspects.	<p>Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent.</p> <p>Prerequisites: Multivariate Calculus, Linear Algebra, Introduction to Probability, Theory of Statistics, Two courses in statistical computing or computer science, including advanced programming</p>

Students receive lectures through Coursera's massive open online course (MOOC) platform, but are advised and assessed by Illinois faculty and teaching assistants on the more rigorous set of assignments, projects, and exams required for university degree credit.

GRE and letter of recommendations are not required to apply.

If you don't have a STEM background, consider taking Data Science Essentials: a self-paced package of online coursework that can help you prepare for the successful completion of the M.S. in Data Science degree.

University of Wisconsin-Madison	https://guide.wisc.edu/graduate/statistics/statistics/statistics-data-science-ma.html	F2F	Statistics: Data Science, MS	30 credits	\$1,014/credit	Nonresident: \$2,125/credit Minnesota: \$1607/credit	The MS Statistics: Data Science program is intended for three types of students: *VISP students: Students from the Visiting International Student Program (Stat VISP or Math VISP). They may request transfer of up to 15 credits from their VISP coursework. *Workforce students: Students coming with 5 or more years in the workforce who have worked extensively with data and are seeking a well-rounded training. *General students: Students who have BS degrees or expected to obtain BS degrees prior to the first semester as MS Statistics: Data Science students.	Applicant must hold a U.S. bachelor's degree from a regionally accredited institution or foreign equivalent. Students admitted to the MS Statistics: Data Science program are expected to have: Calculus and Analytic Geometry I, Calculus and Analytic Geometry 2, Calculus-Functions of Several Variables, The Theory of Single Variable Calculus (or another advanced analysis course), The Theory of Single Variable Calculus (or another advanced analysis course), R for Statistics I, R for Statistics II, Introduction to Probability and Mathematical Statistics I, Introduction to Probability and Mathematical Statistics II.
State of Maryland System Institutions: Overseen by MHEC (http://mhec.maryland.gov/publications/Pages/research/index.aspx)								
Bowie State University	https://www.bowiestate.edu/academics/colleges/college-of-arts-and-sciences/departments/computer-science/graduate/masters-degree/	F2F	Computer Science, MS- Data Science Specialization	36 credits	\$439/credit	\$723/credit	Students interested in focusing on core competencies in machine learning, data mining, data visualization, and cloud computing.	Applicants must hold a bachelor's degree from a regionally accredited institution and have a cumulative grade point average of 2.5 or better (on a 4.0-point scale). In addition, the following prerequisites are required: Calculus of One Variable (i.e. Calculus I and II), One additional mathematics course beyond Calculus, (e.g. Linear Algebra, Differential Equations, Abstract Algebra, Advanced Calculus, Discrete Structures, Probability and Statistics), COSC 503 - Software Design and Development (or equivalent)
Capitol Technology University	https://www.captechu.edu/degrees-and-programs/masters-degrees/technical-mba-business-analytics	Online	Technical Master of Business Administration in Business Analytics	36-39 credits	\$630/credit		The program provides the essential knowledge to enter into the industry in a role managing data assets of budgets, employment, marketing and other data science duties, all of which are essential to the success of a profitable business.	No Information Given
Hood College	https://www.hood.edu/graduate/academics/programs/computer-science-ms	33 credits	Computer Science, MS	33 credits	\$1073/credit		This program is ideal for individuals who want to acquire or update their skills in cutting-edge computer science technologies – and tackle the challenges inherent in capturing, storing, sharing, transferring and analyzing data.	For students applying to the computer science program, please submit the following to the Graduate School: One copy of official transcripts from each institution of higher education attended. A résumé of work experience. Applicants to the graduate program in computer science are expected to have a strong background in computer science and mathematics. Four foundation courses introduce students to algorithms and programming, computer organization and design, advanced data structures and discrete mathematics. Students holding a baccalaureate degree in computer science will normally be exempted from all foundation courses. Other students may
Frostburg State University	https://www.frostburg.edu/academic/admissions/graduate/ms-applied-computer-science/index.php	F2F or Online	Computer Science, MS- Database concentration	30 credits	\$456/credit	\$588/credit	This program prepares students for exciting career opportunities with the government, in network security, web development and a host of other rewarding fields. Unlike theory-based graduate programs, the FSU applied computer science master's degree is highly experiential.	Students without Computer Science degree or background may be required to take up to two foundation courses as part of their program of study before entering the degree program courses.
Johns Hopkins University	https://cp.jhu.edu/programs/online-science-program/data-science	Online or Hybrid	Data Science, MS	30 credits	\$4,920 per course	*Per-course tuition is \$5,872., but with dean support from the Whiting School of Engineering, students receive a decreased out-of-pocket cost.	This program is designed to prepare graduates to succeed in specialized jobs involving everything from the data pipeline and storage, to statistical analysis and eliciting the story the data tells	Applicants must hold a bachelor's degree from a regionally accredited institution. Prior education must include the following prerequisites: (1) three semesters or five quarters of calculus, which includes multivariate calculus; (2) one semester/term of advanced math (discrete mathematics is strongly preferred but linear algebra and differential equations will be accepted); (3) one semester/term of Java or Python (C++ will be accepted but the student must be at least also somewhat knowledgeable in Java or Python); and (4) one semester/term of Data Structures. Linear Algebra or Differential Equations will be accepted in lieu of Discrete Mathematics. A grade of B- or better must have been earned in each of the prerequisite courses.
Loyola University Maryland	https://www.loyola.edu/academics/data-science/graduate	Online	Data Science, MS	31-34 credits	\$925/credit		The master's program provides the skills you need to become a data scientist. As part of the program, Loyola's strong commitment to social justice encourages students to engage with nonprofits.	Applicants must hold a bachelor's degree from a regionally accredited institution. A student is expected to have had a college-level introductory statistics course. A mathematics boot camp prior to the start of the program may be required for students without sufficient mathematics background as determined by the program directors.
McDaniel College	https://www.mcdaniel.edu/node/2380	Online or Hybrid	Data Analytics, MS	30 credits	\$675/credit		You'll notice right from the start that the Professional Master of Science in Data Analytics at McDaniel College is uniquely designed to prepare you for professional success. Every course in the curriculum integrates skills and knowledge that prepares the student to think more critically and through a more peripherally focused lens. This requirement highlights not only our	Applicants must hold a bachelor's degree from a regionally accredited institution with a minimum GPA of 2.75. Prior education must include the following prerequisites: One course in Statistics (required), One course in Calculus (recommended).
Morgan State University	https://www.morgan.edu/advanced-computing/ms.ms_adv_mscd.computing	Online or F2F	Advanced Computing, MS	30 credits	\$455/credit	\$894/credit	This new program is designed for students who have recently completed a bachelor's degree program in Computer Science or a related field and wish to enhance their career, explore research opportunities in Computer Science, and apply their acquired skills in multi-disciplinary teams or for specific focus. The program also meets the needs of students who are already in the workforce and wish to update or improve their knowledge of current computer science.	Applicants must hold a bachelor's degree from a regionally accredited institution with a focus in Computer science or a related field.
Notre Dame of Maryland University	https://www.ndmu.edu/grad/prof-studies/academics/programs/analytic	Online	Analytics, MS	36 credits	\$580/credit		More professionals are needed to manage the architecture of knowledge from traditional- and online-based resources. The online Master of Science in Analytics helps you become an asset in your current role or prepare for the jobs of tomorrow, with a curriculum focused on multidisciplinary competencies in knowledge management technologies, qualitative processes and economic principles of change risk management.	Applicants must hold a bachelor's degree from a regionally accredited institution.
Towson	https://www.towson.edu/csm/departments/computerfocus/grad/computersci	F2F	Computer Science, MS Data Science Track	33 credits	\$642/credit	\$1,158/credit	The master's in computer science provides a comprehensive curriculum with a solid scientific and technical foundation for pursuing either doctoral work or advanced positions in business, industry and government. Graduates find high-profile jobs as software developers, web developers, computer security analysts and e-commerce analysts.	Baccalaureate degree in computer science from a regionally accredited college or university**, or a baccalaureate degree from a regionally accredited college or university** in any other field and completion of one to three preparatory courses from among MATH 263, COSC 501* and COSC 502*. An undergraduate GPA of 3.00 for full admission, or 2.75 for conditional admission, is required.
University of Maryland, Baltimore County	https://professionalprograms.umbc.edu/data-science/https://professionalprograms.umbc.edu/data-science/masters-of-professional-studies-data-science/	F2F	Data Science, MPS	30 credits	\$850/credit	\$1,352	UMBC's Master of Professional Studies (MPS) in Data Science program prepares students from a wide range of disciplinary backgrounds for careers in data science. In the core courses, students will get a fundamental understanding of data science through classes that highlight machine learning, data analysis and data management. The core courses will also introduce students to ethical and legal implications surrounding data science.	Applicant must have an undergraduate degree in any subject; Students must have prior coursework to include college-level math, statistics, and programming. Students who do not have prior coursework or industrial experience should take online courses in statistics, linear algebra, and programming. Minimum undergraduate GPA of 3.0 on a 4.0 scale.

University of Maryland, Eastern Shore	https://www.ccp.umes.edu/cs/eg/	F2F	Applied Computer Science, MS	30 credits	\$346/credit \$641/credit	No Information Given	Admission requirements include a bachelor's degree in a technology related field, such as Engineering Technology, Computer Science, Information Technology, Software or Computer Engineering, Networking, Information Security, or related disciplines. Applications from prospective students with bachelor's degrees in non-technical fields may be considered for admission. All applicants must show a strong record of academic achievement, as indicated by official transcript(s), three letters of recommendation, and a statement of purpose.
UMGC UMD Global Campus	https://academic-programs/master-degrees/data-analytics.cfm	Online	Data Analytics, MS	36 credits	\$694/credit	This program is designed to help prepare you for work in the high-demand field of data science and analysis in a public- or private-sector organization. Potential career fields include data mining, machine learning, and predictive modeling for large data sets.	Applicants must hold a bachelor's degree from a regionally accredited institution. We recommend a background in software programming and statistics. If you do not have demonstrated experience or prior coursework in programming, you may be required to complete additional coursework.

Colleges & Universities in the Washington DC - Baltimore MD area									
American University	https://www.american.edu/programs/data-science/	F2F or Online	Data Science, MS	30 credits	\$1,866/credit		American University's MS in Data Science prepares students to acquire, process, analyze, and present complex data.	The program is open to all students with a bachelor's degree from an accredited institution that have a cumulative grade point average of at least a 3.00 (on a 4.00 scale). Students without sufficient mathematical background as determined by the program directors may be required to complete a mathematical boot camp prior to starting the program.	
Catholic University of America	https://engineering.catholic.edu/academics/graduate/data-analytics/master/index.html	F2F or Online	Data Analytics, MS	30 credits	\$1,250/credit		The curricula for the graduate certificate and master's degree were developed with guidance from lead industry partner Booz Allen Hamilton and is designed to meet the workforce needs of businesses, government agencies, and non-profit organizations. The program is intended for those with	Applicants must hold a bachelor's degree from a regionally accredited institution.	
Columbia University	https://www.datascience.columbia.edu/master-of-science-in-data-science	F2F	Data Science, MS	30 credits	\$2,178/credit		Individuals looking to strengthen their career prospects or make a career change by developing in-depth expertise in data science.	Requires: Undergraduate degree, prior quantitative coursework (calculus, linear algebra, etc.), Prior introductory computer programming coursework	
George Mason	https://www.gmu.edu/programs/data-analytics-engineering-ms	F2F or Online	Data Analytics Engineering, MS	30 credits	\$679.46/credit	\$1,474/credit	Designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence and other information intensive groups generating and consuming large amounts of data.	Applicants must have completed a baccalaureate degree from a regionally accredited program with an earned GPA of 3.00 or better in their 60 highest-level credits. Applicants are expected to have completed a degree in engineering, business, computer science, statistics, mathematics, or information technology, with demonstrated foundational competence in calculus, statistics, and computer programming.	
Georgetown University	https://analytics.georgetown.edu/about	F2F	Data Science and Analytics, MS	30 credits	\$2,358/credit		The Data Science and Analytics program provides students with a rigorous training in computational, mathematical, and statistical methods to prepare them for careers in data science and analytics.	This program is appropriate for students who have recently completed degrees with significant mathematical or statistical emphasis, as well as for mid-career professionals who seek professional advancement or a shift in career track.	
George Washington University	https://www.programs.gwu.edu/data-analytics	F2F	Data Analytics, MS	30 credits	\$2,035/credit		Designed to address the growing demand for professionals skilled in big data and data analytics.	Bachelor's degree with a GPA of at least 3.0 on a 4.0 scale for the last 60 hours of coursework; two courses in mathematics beyond pre-calculus; one year of science with laboratory; courses in computer science using a structured language, discrete structures, data structures, and computer architecture.	
Howard University	https://programs.howard.edu/applied-data-science-analytics/ms/	Online	Applied Data Science & Analytics, MS	30 credits	\$1,481/credit		Howard Graduate School's fully online interdisciplinary M.S. in Applied Data Science and Analytics program prepares data-driven leaders to generate, analyze, interpret, and present complex data in compelling ways that drive solutions to real-world problems. Whether you are interested in	Applicant must have an Online GradCAS application; Statement of purpose/ Statement of academic interest (500-1,000 words); GRE scores not required; Official transcripts sent to GradCAS; 3 letters of recommendation; Bachelor's degree from an accredited college or university Resume or Curriculum Vitae; Autobiographical statement (500-750 words)	
James Madison University	https://www.jmu.edu/grad/prgrams/insaphubs/computer-science-info-security.shtml	Online	Computer Science, Information Security Concentration, MS	30 credits	\$1,065		This concentration is offered in a remote, electronic distance-learning format that, while satisfying all requirements for the Master of Science program, is especially appropriate for people with professional interests in information security. Further information can be obtained from the program website at	No Information Given	
Radford University	https://www.radford.edu/content/casth/msc/dsam.html	F2F	Data and Information Management	30 credits	\$748/credit	\$923/credit	As the volume of information continues to explode, so does the need for IT professionals who can maximize the value of information assets while getting the right data to the right people at the right time.	The Master's in Data and Information program requires a solid foundation in computer science. Students entering the program must have a strong academic background covering the topics in: Introduction to Databases, Principles of Computer Science III, Procedural Analysis and Design, Business Calculus, Calculus and Analytic Geometry I.	
University of Virginia	https://onlineofdatasciencemasters.virginia.edu/	F2F or Online	Data Science, MS	32 credits	\$1,377/credit		The new online Master of Science in Data Science (MSDS) from the University of Virginia School of Data Science expands the accessibility of our cutting-edge curriculum beyond Charlottesville. A part-time master's in data science designed for working professionals	Applicants to the Master of Science in Data Science (MSDS) program must earn an undergraduate degree prior to the start of the summer term in which the program starts. A specific undergraduate major or program of study is not required. Students must complete each of the following prerequisites: Single variable calculus, Linear algebra or matrix algebra, Introductory statistics, Introductory programming.	
Virginia Tech	http://mathetics.cs.vt.edu/ohc-dsas.php	Blended	Data Analysis and Applied Statistics, MA	33 credits	\$806.75/credit	\$1,626/credit	Students seeking admission to the M.A. DAAS degree are those wishing to expand their statistical knowledge beyond the material presented in graduate service courses, tackling more specialized topics, whether they are taught statistical methodology by the Department of Statistics or by other programs/departments on campus.	The Department of Statistics and the DAAS program encourage applications from students in fields other than mathematics and statistics to apply. However, successful applicants will have taken Calculus I and II, and a basic Statistics class as an undergraduate and have done well in those courses. In addition, applicants should be able to demonstrate some experience in computer programming, either in a classroom or professional setting.	
Other Major Institutions Offering Similar Programs									
University of Virginia	https://ds.virginia.edu/degrees/msc-dsas/	F2F	Data Science, MS	32 credits	\$705/credit	\$1,125/credit	Students looking to expand their knowledge and skills in the data science field.	Completed pre-requisite courses in single variable calculus, linear algebra or matrix algebra, introductory statistics, and introductory programming.	
Drexel University	https://drexel.edu/academic/graduate/programs/ms-in-data-science/	Online or F2F	Data Science, MS	45 credits	\$1,396/credit		Designed for students with or without a bachelor's degree in Data Science. Students looking to gain data analytics knowledge to enhance their current role or seeking a career change.	A four-year bachelor's degree from a regionally accredited institution. Those without a prior degree or sufficient work experience in Computer Science, Software Engineering, or Math (plus programming) may have to take additional prerequisites before pursuing advanced computer science courses.

The learning outcomes for the program will be assessed using a combination of formative and summative assessments during and at the completion of each semester. Each course in the program will have homework assignments, practice sets, and other assessments that will be graded with feedback to help assess the student's learning. Midterms and final exams or projects will be cumulative assessments to determine if and to what level the student mastered the learning outcomes for each course.

The assessments will be appropriate to the nature of the course content and the course learning objectives. Both individual assessments and group assessments will be required in the program. This type of variation best mimics the work and industry expectations. The assessments of the program will mirror work products in the industry and prepare students for jobs in industry. For example, many of the elective courses include final projects, presentations and assignments where students have to work with real data sets. Students will be expected to process the data, and perform tasks and make recommendations that are expected of an entry level data scientist/AI engineer.

Lastly, students will also be challenged to complete reflective assessments to apply knowledge and skills in their future professional work. This work will assist students in the job search process and enable them to identify, apply to, and earn positions in this field. The assessments will all follow best practices for adult and professional students. As the student progresses through the curriculum and satisfies learning objectives, they will align with and accomplish the program-level learning outcomes.

OES Distribution to CMNS	\$124,273	\$189,448	\$202,770	\$240,323	\$288,051
Indirect Expenses	\$97,928	\$112,616	\$115,349	\$118,155	\$121,035
Balance	\$26,345	\$76,832	\$87,421	\$122,169	\$167,016

DATE: April 25, 2019

TO: Matthew M. Nesson, Associate Director, Programs; Office of Extended Studies

FROM: On behalf of the University of Maryland Libraries:

Nevenka Zdravkovska, Head, STEM Library

Maggie Saponaro, Head of Collection Development

Daniel Mack, Associate Dean, Collection Strategies & Services

RE: Master of Professional Studies in Data Science and Analytics - Library Collection

Assessment

The University of Maryland Libraries are providing this assessment in response to a proposal by the Science Academy of the College of Computer, Mathematical, and Natural Sciences (CMNS) to create a Master of Professional Studies (MPS) in Data Science and Analytics. This program asked that we at the University of Maryland Libraries assess our collection resources to determine how well the Libraries support the curriculum of this proposed MPS in Data Science and Analytics.

Serial Publications

The University of Maryland Libraries currently subscribe to a large number of scholarly journals, with almost all in online format that focus on various specialties within Computer Science applications, including Data Science, Big Data, Analytics, and Machine Learning. The Libraries subscribe to several of high ranked journals that are listed in Journal Citation Reports* under the categories: Mathematics, Interdisciplinary Applications or Computer Science, Interdisciplinary Applications. Among the journals relevant to data science and analytics are the following journals, all available online:

- Computational Statistics and Data Analysis
- EPJ Data Science
- Statistical Analysis and Data Mining
- International Journal of Data Science and Analytics [new journal]
- Journal of Machine Learning Research
- Machine Learning

Also, the Libraries have subscription to IEEE and ACM publications, which are numerous and can be accessed through the relevant databases, as discussed below.

Due the interdisciplinary research and instruction inherent in data science and analytics, there may be highly-ranked core journals to which the Libraries do not currently subscribe. However, articles in journals that we do not own likely will be available through Interlibrary Loan/Document Delivery.

Databases

The Libraries' Database Finder (<http://www.lib.umd.edu/dbfinder>) resource offers online access to databases that provide indexing and access to scholarly journal articles and other information sources. Many of these databases cover subject areas that would be relevant to this proposed program, especially since due to the interdisciplinary applications of data

science and analytics. Databases that would most be useful in the field of machine learning are

- IEEE Xplore
- ACM Digital Library
- ScienceDirect

In many and likely in most cases, these indexes offer full text copies of the relevant journal articles. In those instances that the journal articles are available only in print format, the Libraries can make copies available to graduate students through either the Libraries' Scan & Deliver Program (<http://www.lib.umd.edu/access/scan-deliver>) or via Interlibrary Loan (more details given below).

Monographs

The Libraries regularly acquire scholarly monographs in data science and analytics and allied subject disciplines. Monographs not already part of the collection can usually be added upon request. The Libraries has also acquired many eBooks and eBook collections, like:

- Springer eBooks in Computer Science and Springer eBooks (2005-2011)
- SIAM eBooks
- SPIE eBooks
- Synthesis Digital Library (Morgan & Claypool)
- IEEE/Wiley eBooks

A search of the University of Maryland Libraries' WorldCat UMD catalog was conducted, using a variety of relevant subject terms. This investigation yielded sizable lists of citations of books that we own related to data science and analytics. In addition, we own hundreds of monographs published within the last five years, insuring the program has access to relevant and recent holdings. Additionally, the Libraries' membership in the Big Ten Academic Alliance (BTAA) increases these holdings. As with our own materials, graduate students can request that chapters be copied from these BTAA books if the books are not available electronically.

Scan & Deliver and Interlibrary Loan

These services offer online delivery of bibliographic materials that otherwise would not be available online. As a result, remote users who take online courses may find these services to be helpful. Scan & Deliver and Interlibrary Loan are available free of charge.

The Scan & Deliver service scans and delivers journal articles and book chapters within three business days of the request--provided that the items are available in print on the UM Libraries' shelves or in microform. In the event that the requested article or chapter is not available on campus, Scan & Deliver will automatically refer the request to Interlibrary Loan (ILL). Interlibrary Loan is a service that enables borrowers to obtain online articles and book chapters from materials not held in the University System of Maryland.

Additional Materials and Resources

In addition to serials, monographs, and databases available through the University Libraries, students in

the proposed program will have access to a wide range of media, datasets, software, and technology.

- Library Media Services (<http://www.lib.umd.edu/lms>) houses media in a variety of formats that can be utilized both on-site and via ELMS course media.
- GIS Datasets are available through the GIS Data Repository (<https://www.lib.umd.edu/gis/data-and-resources>).
- Statistical consulting and additional research support are available through the Research Commons (<http://www.lib.umd.edu/rc>), and technology support and services are available through the Terrapin Learning Commons (<http://www.lib.umd.edu/tlc>).

Additionally, although not likely to be highly used by this program, UMD does have a number of microform collections, which may be of use for interdisciplinary research. Finally, the STEM Library is a Patent and Trademark Resource Center and provides patent and trademark research consultation. The subject specialist librarian for Computer Science is Nevenka Zdravkovska (Nevenka@umd.edu) and will also serve as an important resource to programs such as the one proposed.

Other Research Collections

Because of the University's unique physical location near Washington D.C., Baltimore and Annapolis, University of Maryland students and faculty have access to some of the finest libraries, archives and research centers in the country vitally important for researchers in this discipline. These include the Library of Congress, the National Archives, the Smithsonian, and more available for research use.

Conclusion

With our substantial journals holdings and index databases, as well as additional support services and resources, the University of Maryland Libraries have the resources to support teaching and learning in data science and analysis. These materials are supplemented by a strong monograph collection and additional holdings through the Big Ten Academic Alliance. Additionally, the Libraries Scan & Deliver and Interlibrary Loan services make materials that otherwise would not be available online, accessible to remote users. As a result, our assessment is that the University of Maryland Libraries are able to meet the curricular and research needs of the proposed MPS in Data Science and Analysis to be offered from the College of Computer, Mathematical, and Natural Sciences (CMNS).

*Journal Citation Reports is a tool for evaluating scholarly journals. It computes these evaluations from the relative number of citations compiled in the Science Citation Index and Social Sciences Citation Index database tools.

Faculty Information- Data Science

The following faculty members are projected to teach in the program. All faculty are full-time unless otherwise indicated.

Name	Highest Degree Earned, Program, and Institution	UMD Title (indicate if part-time)	Courses
Babak Azimi-Sadjadi	Ph.D., ECE, UMD	Visiting Lecturer	DATA/MSML 603: Principles of Machine Learning
Sandra Cerrai	Ph.D., Mathematics, Scuola Normale Superiore of Pisa	Prof & Assoc Chair	DATA/MSML 601: Probability and Statistics
Michael Cummings	Ph.D., Organismic and Evolutionary Biology, Harvard University	Professor	DATA698: Research Methods and Study Design
Wojtek Czaja	Ph.D. Washington University, St. Louis	Professor	DATA 604: Data Representation and Modeling
Mohammad Taghi Hajiaghayi	Ph.D., Computer Science, MIT	Professor	DATA/MSML 602: Principles of Data Science
Leonid Korolov	Ph.D., Mathematics, SUNY at Stony Brook	Prof & Assoc Chair	DATA/MSML 601: Probability and Statistics
Alejandra Mercado	Ph.D., ECE, UMD	Associate Director	DATA/MSML 603: Principles of Machine Learning
Abdirisak Mohamed	Ph.D. Mathematics, Karlsruhe institute of Technology	Lecturer	DATA 606: Algorithms for Data Structures
Vincent Paul Lyzinski	Ph.D. in Applied Mathematics and Statistics, Johns Hopkins University	Associate Professor	DATA607: Communication in Data Science and Analytics
Arefeh A Nasri	Ph.D., Transportation Engineering, UMD	Visiting Lecturer	DATA/MSML 602: Principles of Data Science
Zoltan Safar	Ph.D., ECE, UMD	Director	DATA/MSML650: Cloud Computing
Giacinto Saggese	Ph.D. ECE, University of Illinois Urbana-Champaign	Lecturer	DATA 605: Big Data Systems
Shabnam Tafreshi	Ph.D., Computer Science, George Washing University	Asst Research Scientist, ARLIS	MSML641- Natural Language Processing
Jerry Wu	Ph.D., RF MEMS, George Washington University	Lecturer	MSML642: Robotics
